JOHN D. ANTARAMIAN

MARINE & SYSTEMS ENGINEER | HEAVY INFRASTRUCTURE | PROJECT MANAGEMENT

Palm Desert, CA • 305-741-2025 • johnantaramian@gmail.com

Eligible for U.S. Security Clearance

PROFESSIONAL SUMMARY

Marine Engineer and certified PMP with more than 15 years of hands-on experience leading technical programs, heavy infrastructure projects, and marine systems development. Experienced in managing design and construction work, working through regulatory requirements, coordinating with public and private stakeholders, and turning engineering requirements into practical, durable equipment and structures. Extensive experience working with the U.S. Army Corps of Engineers and U.S. Navy on maritime construction and structural testing.

CORE COMPETENCIES

Infrastructure & Project Management: Full project lifecycle management, cross-functional leadership, budget and schedule tracking, requirements definition, statutory compliance.

Marine & Subsea Engineering: Semi-submersible systems, structural deployment, marine hydrodynamics, pressure vessel mechanics.

Design & Manufacturing: CAD development, 3D scanning, structural analysis, design for manufacturing, CNC machining, sheet metal, composites, and high-strength alloys.

Field Operations & Safety: Expeditionary deployments, military stakeholder coordination, field inspections, technical diving, and safety oversight.

PROFESSIONAL EXPERIENCE

Consultant, Autonomous Maritime Systems

March 2026 — Present | *Oceanus* | *Palm Desert, CA*

- Provide subsea and marine engineering consulting for autonomous maritime platforms, with an emphasis on structural durability and system integration for deep-submergence environments.
- Advise on technical decisions for complex maritime operations, connecting mission requirements with practical hardware performance.

Founder & Principal Subsea Systems Engineer

2012 — Present | *ScanIQ & SubSurface Designs* | *Palm Desert, CA*

- Lead full lifecycle development of high-performance subsea vehicles, from initial requirements through engineering, fabrication, and on-water acceptance testing.
- Design and integrate complex electromechanical systems and custom propulsion equipment.
- Apply structural analysis and manufacturing methods across CNC machining, sheet metal, composites, and high-strength alloys.

Suspension & Optimization Engineer

2026 — Present | *State's Performance & MX6 Racing* | *California*

- Engineer and refine high-performance mechanical systems using 3D scanning, CAD, structural analysis, and rapid prototyping.
- Reverse-engineer structural components and develop practical improvements for dynamic performance.

Marine Systems Development & Applied Engineering

2012 — 2019 | *Aqua Ranch* | *Islamorada, FL*

- Worked directly with U.S. Navy Seabees and the U.S. Army Corps of Engineers to design, fabricate, and install underwater structural training assets and maritime testing systems.
- Conducted technical diving and on-water safety operations, including deep structural deployment, underwater welding, and mechanical testing.
- Worked directly with defense end-users to turn operational needs into structural requirements suitable for field deployment.

Project Manager & Technical Operations Lead

2007 — 2014 | Antaramian Development Group | Naples, FL

- Managed multidisciplinary engineering and heavy-infrastructure projects in complex maritime environments.
- Coordinated statutory requirements, budgets, schedules, and multiple stakeholder needs to support successful project delivery.

EDUCATION & CREDENTIALS

Oxford University

Degree in the Classics with a concentration in Architecture and Economics

New York University (NYU)

College of Arts and Science, attended for Applied Science

CERTIFICATIONS

- Project Management Professional (PMP)
- Certified Rescue Diver
- Six Sigma Fundamentals
- OSHA 30
